PROFESSIONAL SUMMARY

Motivated Software Engineering Undergraduate at Staffordshire University with hands-on experience in full-stack web development, mobile application development, and object-oriented software design. Proven track record of building robust software solutions using C#, Java, PHP (Laravel), Dart (Flutter), JavaScript, and Python. Passionate about writing clean, maintainable code, exploring machine learning applications, and solving real-world software engineering challenges in dynamic team environments.

TECHNICAL SKILLS

Programming Languages: Java, C#, PHP, Dart, Python, JavaScript (ES6+), HTML5, CSS3, SQL

Frameworks & Libraries: Laravel, Flutter, Tailwind CSS, Bootstrap, Node.js, Express.js

Databases & Tools: MySQL, Git, GitHub, Stripe API, Jupyter Notebook, VS Code, Visual Studio

Concepts & Methodologies: Object-Oriented Programming (OOP), Multithreading & Concurrency, RESTful APIs, Machine Learning, Database Architecture, Agile Development, UI/UX Design

EDUCATION

Staffordshire University 2023 – 2026

BEng (Hons) in Software Engineering

- Specializing in Software Development, Database Management, Concurrent Programming, and System Architecture.

Sri Jayewardenepura Maha Vidyalaya 2012 – 2022

G.C.E. Ordinary Level Education

- Successfully completed secondary education with a strong foundation in Science & Mathematics.

FEATURED SOFTWARE PROJECTS

PC Building Web Application (NextGen)

Technologies: PHP, Laravel, Tailwind CSS, MySQL, Stripe API

- Engineered a full-stack e-commerce application enabling users to configure custom PC builds, select compatible hardware parts, and make online purchases.
- Integrated Stripe payment gateway for multi-currency online checkout and secure transaction management.
- Designed responsive web interfaces using Tailwind CSS and structured relational MySQL database tables for inventory management.

Real Estate Mobile & Web Suite

Technologies: Flutter, Dart, PHP, Laravel, Tailwind CSS, MySQL

- Developed a cross-platform mobile application in Flutter (Dart) integrated with a Laravel REST API backend for real estate property browsing.
- Implemented real-time property filtering, user account management, listing creation, and secure image data handling.
- Ensured fluid cross-device UI responsiveness and seamless database synchronization between mobile and web clients.

SYOS Inventory & Concurrent Processing System

Technologies: Java, Multithreading, OOP Principles, MySQL

- Architected an enterprise-level inventory management application built on object-oriented programming principles and thread safety.
- Developed a concurrent transaction processing engine handling simultaneous checkout operations, stock updates, and automated reorder reporting.

Operator Skill Prediction System

Technologies: Python, Jupyter Notebook, Machine Learning, Scikit-Learn, Pandas

- Constructed a predictive analytics model to evaluate operator performance logs and forecast skill progression curves.
- Applied feature extraction, data cleansing, and classification models to generate actionable workforce insights.

Cab Management System

Technologies: C# (.NET Framework), Object-Oriented Programming, MySQL

- Built a desktop application to automate cab dispatching, passenger bookings, and driver allocations.
- Implemented OOP concepts (Encapsulation, Inheritance, Polymorphism) and integrated MySQL for real-time data persistence.

SmartRetailX Platform

Technologies: JavaScript, Node.js, Express, HTML5, CSS3, MySQL

- Developed a web application for retail store inventory management, billing workflows, and sales tracking.
- Built RESTful endpoints for fast inventory lookups and transaction record logging.

Sri Lanka Wildlife Interactive Web Application

Technologies: HTML5, CSS3, JavaScript

- Created an interactive web application showcasing native wildlife with dynamic content filtering and accessible layout design.

SOFT SKILLS & COMPETENCIES

- **Problem Solving:** Strong algorithmic logic and systematic debugging mindset.
- **Critical Thinking:** Ability to analyze complex requirements and design efficient software solutions.
- **Time Management:** Excellent project tracking, task prioritization, and deadline adherence.
- **Team Collaboration:** Adaptable, enthusiastic team player comfortable in Agile development environments.
